

SERP 2020 Group 9: Weekly Report – Joshua Wright

Week 6

What have I done for the project this week individually?

This week I conduct a couple of paper readings then reviewed them for the project proposal. Along with spending time writing and expanding on the project proposals requirements sections.

I read through a couple of papers for this project proposal, but in the end only really one ended up being relevant enough to the project that we are working on to be worth outlining in our proposal for other evidence in full. The others were referenced but not fully explored because of this. The papers that I did end up reviewing were quite useful as they shared several aspects of information that was similar to what was outlined by our client in our first meeting.

What you plan to do for the project next week individually?

Well the break coming up will allow for me to spend some time to try and figure out what exactly we need to do to progress with this project. As this project is not exactly in my stronger fields of study, I have found it quite tricky to understand what we are even trying to do / achieve in this project. I'm hoping over the break to better understand the project outline and what I need to do to best move it along and improve on the final product.

List the issue you encounter and give reasons if applicable.

This week did not really throw up many issues other than time management. It has been a lot of hard work for our group to get this project proposal together. This was due to having several other assignments that were also due in a very similar time period to this task. But as a group I feel that we have done our best to get through that by spending a couple of what were quite late nights working on the project. This in hindsight most likely was not the most effective way to spend our time working on it but it worked for us at the time.
