

SERP 2020 Group 9: Weekly Report – Joshua Wright

Week 4

What have I done for the project this week individually?

This week I honestly really did not get much done for this project. I personally got really busy with work outside of UNI and that really has not helped me in planning for this week.

I did get around to organising my notes that were on paper so I can better refer back to them more easily throughout future iterations.

Outside of my unintentional lack of work this week, has been keeping up following different news stories about covid-19 as our project recently pivoted into being about pandemics. I feel that even though I have not taken a ton of notes in regard to this information. I have been looking at some of it in detail. Mainly looking at different ways that the rate of infections can be best plotted to show how the spread of new infections.

What you plan to do for the project next week individually?

This week I plan on helping get the next client meeting agenda sorted out along with trying to work out what the next steps that we need to take as a group are for this project to move forward.

I also want to gain a better understanding of how different viruses spread and transmit to see if that will be information that would be beneficial to add into our project.

I also want to just gain a better understanding of the project as a whole and ensure that all of the group members are on the same page in regard to what we need to do. Along with what the final end goal of our project is. As without everyone being in full agreement about that it could be trickier to cooperatively move together as a group.

List the issue you encounter and give reasons if applicable.

The only issue I had this week was time management around the chaos that the covid-19 outbreak has caused. But I feel that I have managed to get some things looked at and I feel better prepared for the next week and client meeting. Having the client meeting pushed back to its original week has given me a bit of breathing room to ensure that I can get some more work done for the next meeting.
